We invite leading scientists and experts to publish their materials.

The main aim of the electronic edition is to provide information support for the creation and implementation of scientific innovative technologies (especially nanotechnological products) in the construction industry, housing and communal services as well as in adjacent areas which are closely related to construction (engineering industry, power systems etc).

The electronic edition “Nanotechnologies in Construction: A Scientific Internet-Journal” has been published since 2009 and its periodicity is 6 issues a year. The electronic edition «Nanotechnologies in Construction: A Scientific Internet-Journal» has been included: Chemical Abstracts (USA), EBSCO Publishing (USA), EZB (Germany), Global Impact Factor (Australia), CrossRef (USA), ResearchBib (Japan),
ResearchGate
(
USA), Scientific Electronic Library (Russia), Ulrich’s Periodicals Directory (USA).
Each scientific article is assigned UDC and DOI.
The papers are published in Russian and English.

You can find all issues and requirements to the published materials on the official website (http ://nanobuild.ru/en_EN/
).

Considering the experience of the edi-torial staff of Internet-Journal «Nano-technologies in Construction» we are ready to create and develop jointly Internet-editions of orga-nizations, associations and partnerships.
