In the general assembly of the Russian Academy of Engineering (RAE) and the International Academy of Engineering (IAE) convened on March 18, new academicians and corresponding members were selected, and Chairman of the Ruentex Group, Dr. Samuel Yin, was elected as the first honorary president of the IAE. Prof. Boris Gusev, who was once again voted in as president of the RAE and IAE, noted that this appointment was a nod to the significant contribution Dr. Yin has made to engineering technology as well as his long-lasting efforts to facilitate the interaction between the IAE and other international engineering institutes.

(Dr. Samuel Yin)

Moreover, it is a recognition of his contribution with regard to the establishment the Tang Prize, an international prize that is aimed to better the future of mankind. Prof. Gusev explained that honorary president is a highly-revered position and it was also the first time in the 30-year history of the IAE that this honor was conferred. They have also invited Dr. Yin to give a speech at the International Scientific and Practical Conference dedicated to the 30th Anniversary of the Russian Academy of Engineering and International Academy of Engineering, which will be held on May 13, 2021.
