To celebrate the 10th anniversary of the establishment of TCIAE, Dr. Chern went on a trip to Moscow, accompanied by other academicians of TCIAE, including Professor Yun Yen, Professor Kuo-Chun Chang, former Academia Sinica President Chi-Huey Wong, Secretary General of TCIAE Professor Hui-Ping Tserng, as well as members of TCIAE such as Chair of the Department of Civil Engineering at National Taiwan University Professor Shang-Hsien Hsieh. In the assembly taking place on April 26 th, Professor Gusev, president of the IAE, made a special reference to Dr. Yin and the Tang Prize. Invited to deliver a speech to the assembly, Dr. Chern reflected on TCIAE's contribution to the technological cooperation between Taiwan and Russian during the past decade, while also taking the opportunity to promote the Tang Prize in this grand occasion.

Professor B.V. Gusev, president of the RAE, announced that in addition to the order of "Engineering Fame," this year, the RAE and the IAE decided to create two more orders in honor of Dr. Samuel Yin, founder of the Tang Prize Foundation and the first vice president of the IAE, and Mr. Boris Evgenievich Paton, the legendary Ukrainian scientist, honorary president of the IAE and president of the National Academy of Sciences of Ukraine.

Claiming 566 patents for his inventions in the field of building construction technology, Dr. Yin is especially lauded for developing an efficient and precise method for constructing earthquake-resistant structures, and Mr. Paton, who turned 100 in 2018, is a world-renowned figure in the field of welding, metallurgy, and technology of materials and material science. The "International Engineering Academy Star of Fame" order, with Dr. Yin's portrait inlaid in the center and the Chinese characters of the Tang Prize in the background, was presented by Professor Gusev and accepted by Dr. Jenn-Chuan Chern, president of Taiwan Chapter of International Academy of Engineering (TCIAE) and CEO of the Tang Prize Foundation, on behalf of Dr. Yin. As a token of recognition of the Tang Prize ethos "for the betterment of the world," it can be awarded to scientists of outstanding achievements in engineering.
