THE ISSUE:

- The selection of production technology of polymer-bitumen binders as an innovative nanobinders used in asphaltic concrete pavemen.
- Wastewater treatment system based on nanomodified natural sorbents.
- Wuhan University of Technology is one of the leading Chinese universities.
- Structure of pores in solid porous bodies.
- Sixth International Symposium in Nanotechnology in Construction NICOM6 (Hong Kong, 2–5 December 2018).

- Investigation of properties of liquid ceramic thermal insulation materials.
- About the international Tang Prize.
- Research of efficiency of natural and modified sorbents for purification of industrial sewage from heavy metal ions.
- The paper contest dedicated to the 10th anniversary of the edition «Nanotechnologies in Construction: A Scientific Internet-Journal» is going on. The contest results will be presented in November–December 2018 and published in the electronic edition «Nanotechnologies in Construction: A Scientific Internet-Journal» 1/2019, on the website of edition and journal partners' Internet-sources.
- and more.
